

# INNOVATION IN SEED TECHNOLOGY

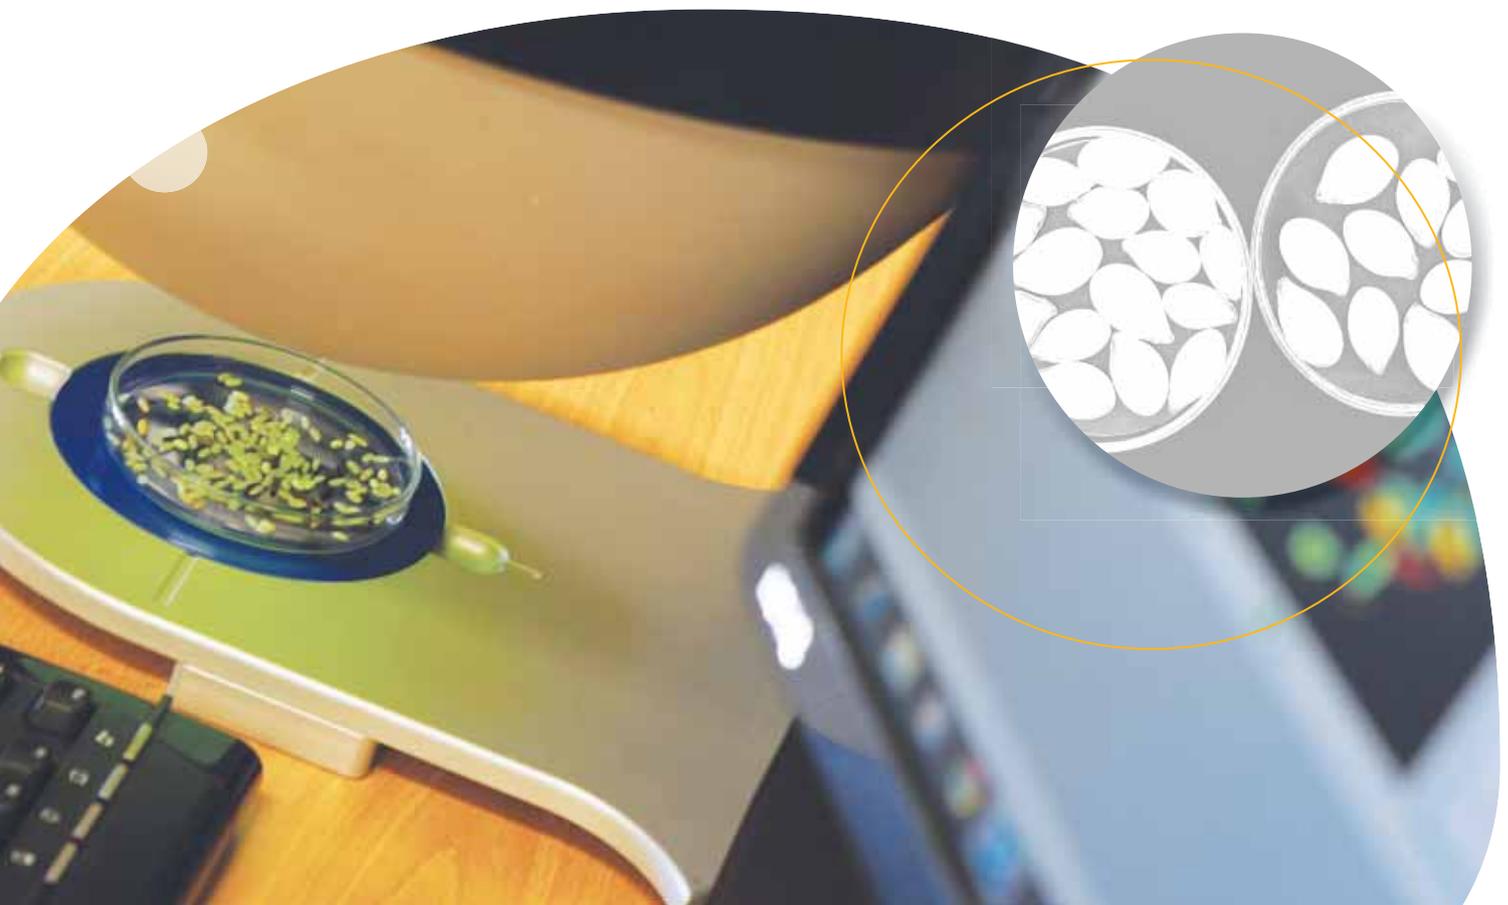

# WHO IS THE CENTOR GROUP?

**WE ARE FOCUSED ON DELIVERING SEED  
IMPROVEMENT TECHNOLOGIES THAT MAKE  
A DIFFERENCE.**

Centor Group is committed to taking a fresh approach towards better crops, better environmental outcomes and better food. We keep our mind and ears open to new ideas and use science to develop them to help our customers stay ahead of the game.

Our ongoing investment in both people and technology provides a valuable knowledge base offering unique insights to our customers. From the integrity and brilliance of our seed coatings through to the sophistication of leading-edge analytical equipment, drying and seed treatment machinery, we have the technology and knowledge to meet every challenge.

# ETHICAL STANDARDS AND COMPLIANCE WITH OUR CODE OF CONDUCT

## WE STRONGLY BELIEVE THAT WE CAN DO GOOD BUSINESS WHILE BEING A GOOD BUSINESS

Doing things right is one of our most important values at the Centor Group. We work hard every day to provide products that enhance the lives of people in our community, our country, and all over the world.

We are clear about what we mean when we talk about doing things right. Not only does it mean that we provide products that are well made, fairly priced, and of exceptional quality, but it also means that every step we take in making those products is taken with ethics and integrity in mind.

The Centor Group commits to sourcing material from suppliers who have a commitment to human rights, ensuring our supply chain is of high integrity and monitoring our entire operation for compliance with our code of conduct.

## THE CENTOR GROUP WILL HAVE AN OVERALL, POSITIVE IMPACT ON PEOPLE AND THE ENVIRONMENT

We recognize that our business has an impact on social and environmental issues, in particular people's working conditions and their developmental opportunities.

This is a pre-condition to our future growth, a growth that will be achieved along with suppliers, members and distributors that share the same vision and ambition.

Trust, integrity and honesty are our core values and the foundation of the Centor Group.

# SEED APPLIED PRODUCTS & TECHNOLOGIES

## USING SEED AS AN EFFICIENT LOW COST VEHICLE FOR EVERYTHING A PLANT NEEDS TO THRIVE AND SURVIVE

As the seed is the central focus of everything you do and everything we do, it needs to be carefully packaged to enable it to reach its fullest potential. The seed coating products that are uniquely formulated by Centor's own dedicated research team for the premium Seedworx™ range offers added value in the minimisation of dust, improved flow through seed treatment facilities, enhanced plantability and the best-looking seed.

We have customised our products to meet the demand for more environmentally sensitive requirements thereby allowing organic farmers and producers to benefit from seed coatings that have the same levels of quality as standard coatings.

We already have products used in organic agriculture, however the ever-changing market led us to develop a new range of Seedworx™ coatings in our BioBased platform, which are developed from natural resources and can also be used in mainstream markets.

We truly value forward thinking and from our research and development pipeline, we look towards adding greater benefits in terms of nutrition, bio-based and biological products.

As one of the most comprehensive seed technology groups, with products that span seed coating treatment machinery, seed drying and speciality coating materials we can help you to combine them all to get more effective results.

For those operating in price sensitive markets or with seed that doesn't require all the technical advances, Centor has the ezi-cote™ range of seed coating materials to ensure we have a product offering that fits.

# DRYING TECHNOLOGIES

The Centor Group has the best solutions for drying, storing, maximising and rescuing your seeds at an affordable price.

We are a research driven group and we know how and where viable seeds are destroyed through lack of good seed husbandry.

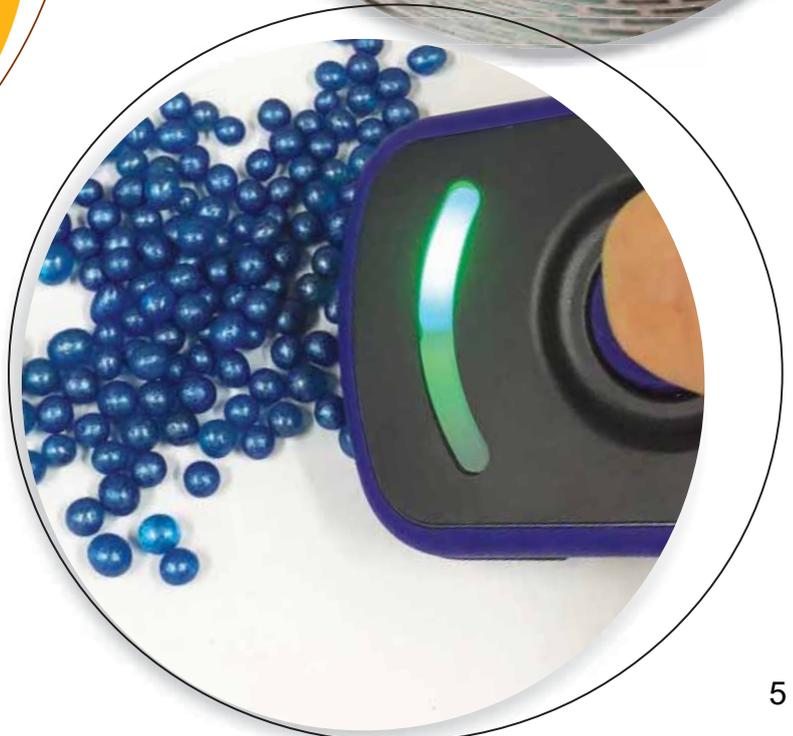

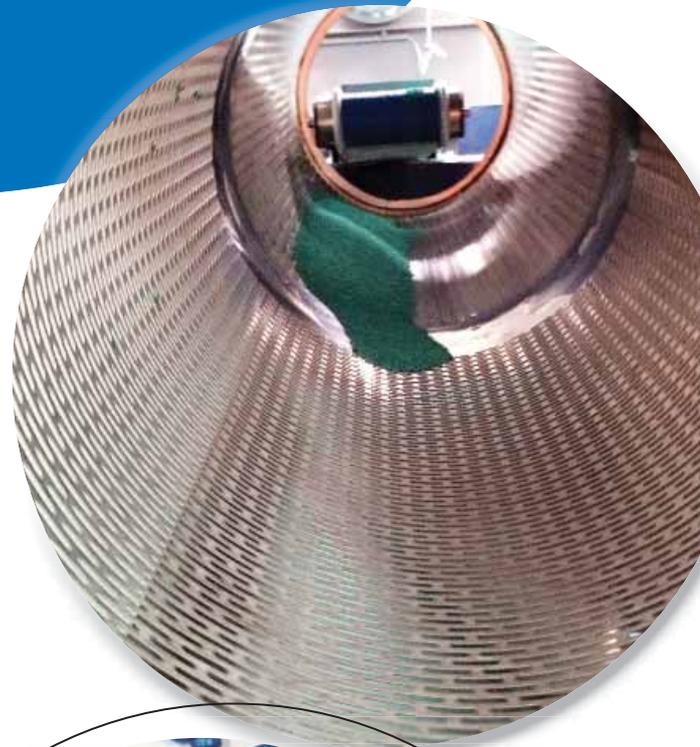

From small low-cost dryers to the sophistication of high volume drying equipment, we have the technology and knowledge to meet every challenge.

Our objective is to use seed as an efficient low-cost delivery vehicle for everything a plant needs.

## IMPRINT TECHNOLOGY

Protecting your seed investment, brand and integrity is paramount; the Centor Group is ready to deliver peace of mind for you and your customers.

We can provide you with a customised Seedworx™ Imprint coating polymer solution to help clearly identify your products.

# PRODUCT INNOVATION

## YOUR INVESTMENT IS CONSIDERABLE AND THE LIFELINE TO YOUR BUSINESS

If you can't measure you can't manage. Centor is engaged in seeking out, developing and testing in our own laboratories the analytical tools which enable seed managers to make better decisions.

Centor offers a wide range of analytical equipment capable of collecting a host of information on all aspects of seed and seed coatings.

Depending on your point in the production chain there are several analytics that can help you improve results and efficiency.

Centor has a multi-disciplinary global team of scientists and experts who are focused on helping solve problems that can be general or extremely site specific.

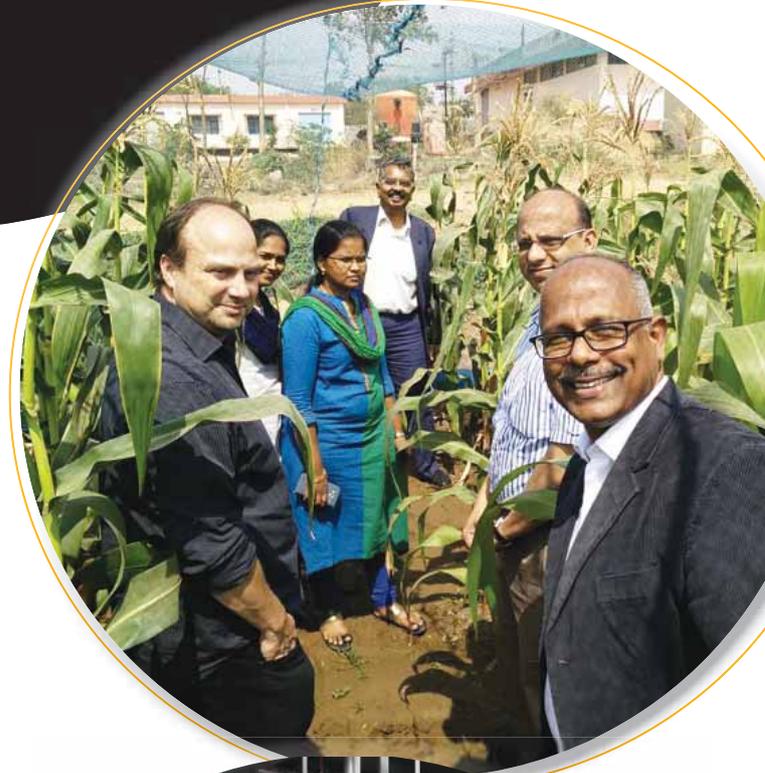

If you have a specific problem needing a solution or better information about your inventory important to you, we are here to help.

# OVER 500t/month CAPACITY FROM 5 GLOBAL LOCATIONS

## GLOBALLY FOCUSED OPERATING LOCALLY

Our three centres of excellence located in Europe, Australia, and USA have a global focus yet operate locally to deliver synergistic, customised solutions to our customers.

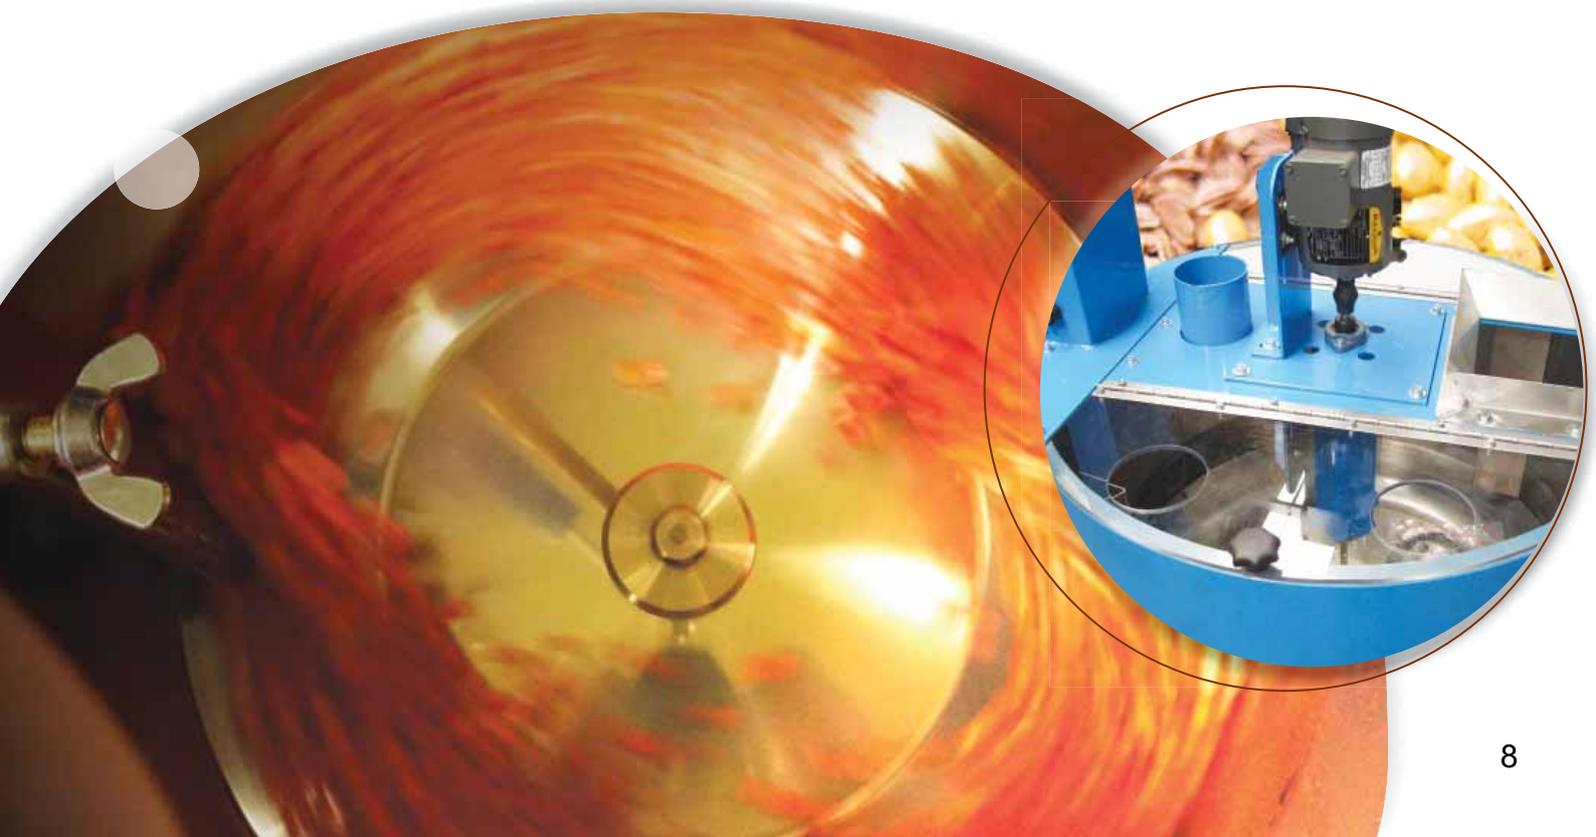

# SEED TREATMENT MACHINERY

THE CENTOR GROUP PROVIDES AN  
EXTENSIVE RANGE OF OUR OWN  
DESIGNED AND ENGINEERED SEED  
TREATMENT EQUIPMENT

These range from easy to use laboratory and high volume agro - commercial and basic coaters, right through to state-of-the-art sophisticated turnkey automated facilities.

These systems offer flexibility through options that include selection of the number of pumps required for the liquid inputs as well as the number of powder feeders for the addition of blends or finishing powder, and even a choice between steel and stainless construction.

The Centor Group has the right equipment and coating protocols to suit all needs and budgets. We are ready to answer your questions and provide you with solutions.

## BIOBASED COATING MATERIALS

The world over has seen a developing understanding of the impact we have on our own environment.

Centor Group has always held an appreciation for setting a high value on suitable product selection, maintaining standards higher than those actually required for its products.

We have introduced a new range of products which clearly demonstrates our commitment to our customers who also value these ethics.

These products fall under the umbrella of our Seedworx™ BioBased branding.

Our first product in this range goes further than just using products which are sustainably sourced from natural ingredients, it is also organically certified under both European and NOP regulations.

***Isn't this what  
you would expect  
from your coating  
supplier?***

# CONSULTING, RESEARCH AND TRAINING

THE EFFICIENT AND FORWARD LOOKING  
INNOVATION PROCESS WITHIN THE  
CENTOR GROUP IS GUIDED BY THE  
INNOVATION COUNCIL

The Council acts as a central platform for sharing information and experience across the group. It guides our R&D team and reviews the latest developments in the fields of science and technology with practical, marketable outcomes front of mind.

People are one resource every seed business knows drives value; the Centor Group is positioned to enhance your seed technology skill set.

# BUILDING ON A SUCCESSFUL PORTFOLIO

## THE CENTOR GROUP IS COMMITTED TO TAKING A FRESH APPROACH TOWARDS PROBLEM SOLVING

The Centor Group is always building on its successful portfolio of seed improvement technologies, so if you have a product that you believe would make a difference in our market and would like to access our distribution network please contact us.

## INTERESTED IN BECOMING A CENTOR GROUP MEMBER, DISTRIBUTOR OR SUPPLIER?

The Centor Group wishes to expand its global footprint through people who have a passion for our industry or a customer base in a similar category.

If you have an interest in becoming a Centor Group member or distributor, please contact us for further information.
